

Tabletopics: Integration

Summary

Integration encourages participants to use new words, weaving them into their table topic, well... On the fly! Participants try to integrate random words into their table topic.

Instructions

1. Have every participant write a word on a slip of paper, or have a projected screen filled with words.
2. Each table topic deliverer draws 2+ words and must use them to craft a table topic (or uses words from the screen).
3. Optionally give points for each time a word is used to see who uses the most words!

Sample Words

- Ability
- Determination
- Computer
- Jet Lag
- Dizzy
- Odd
- Quirk
