

Tabletopics: Pairings

Summary

Pairings is a creative, different table topic. Participants randomly choose from 2 categories and explain a relationship (that you choose) between the chosen words.

Instructions

1. Fill two separate baggies/hats with complimenting noun categories (Eg. Celebrities and Occupations, Sesame Street Characters and Sports.)
2. Ask a participant to choose a word from each baggie.
3. The participant must explain the relationship you choose between the two selections (Eg. Why is Britney Spears the best Electrician? How is Elmo built to play soccer?)

Sample Categories

- | | | |
|----------------------------|------|-----------------------|
| • Celebrities | | Occupations |
| • Sesame Street Characters | | Sports |
| • Different Ages in Life | with | Music Genres |
| • Fruits & Vegetables | | Life Events |
| • Relatives | | Classroom Stereotypes |
| • Animals | | Names |
